

The Facts

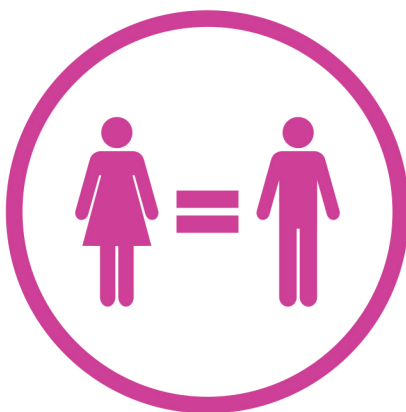

about Pancreatic Cancer

Pancreatic Cancer is the UK's **Fifth Biggest** Cancer Killer

Half of all patients
are **diagnosed**
as an **emergency**

Pancreatic cancer
affects **men** and
women equally

Receives only
3.1% of cancer
research funding

Twenty nine people
are **newly diagnosed**
with the disease
each day

For those **diagnosed in**
time for surgery their
chance of surviving
beyond five years
increases tenfold

Currently **less**
than 8% of those
diagnosed survive
beyond 5 years

Saving lives through early diagnosis
