

---

# Pancreatic cancer is the UK's **fifth biggest** cancer killer

---

**Twenty seven** people are newly diagnosed with the disease **each day**

For those **diagnosed in time for surgery**, their chances of surviving beyond five years **increases by up to 30%**

Currently, **less than 7%** of those diagnosed survive beyond **5 years**

Almost **half** of all patients are diagnosed as an **emergency**

Pancreatic cancer affects **men and women equally**

Receives less than **3%** of cancer research funding
