## Why should I know about pancreatic cancer?

- ▶ Pancreatic cancer is the UK's 5th biggest cancer killer.
- ▶ In most cases, it can develop unexpectedly with no family connection to the disease.
- ▶ Knowing the signs and symptoms means you can act on any concerns you might have, sooner.
- ▶ Early diagnosis significantly increases your chance of receiving potentially life saving surgery.

### The facts:

- ▶ Pancreatic cancer can affect any adult. It occurs equally in men and women.
- ▶ Almost 10,000 people are diagnosed each year in the UK (that's the same as 909 football teams).
- ▶ 9,000 people die each year, and only 7% survive 5 years.
- ▶ Surgery is currently the only cure.
- ▶ 5-year survival increases to 30% if you can have surgery followed by chemotherapy.

## What we do

Our **mission is to improve survival rates** of pancreatic cancer and **improve the quality of life** for those affected by the disease by focusing on early diagnosis.

### We are doing this by:

-  Improving the knowledge of healthcare professionals by providing free resources and e-learning
-  Raising public awareness of pancreatic cancer and its symptoms
-  Producing free, easy to understand, information for patients and their families, online and in print
-  Campaigning for more funding and better treatments for pancreatic cancer

## Help us **take action!**
